

ARMAN ATTAR

Bengaluru, India | +91 9353785599 | ayanattar49@gmail.com | [LeetCode](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Recent Computer Science & Engineering (AI & ML) graduate with a **9.09 CGPA, 90.90% overall engineering aggregate**, and **93.67% final-year aggregate**. Hands-on experience in Python, SQL, web development, and AI/ML through academic projects and practical training. Built web applications and AI-based solutions using Python, Django, SQL, HTML5, CSS3, JavaScript, React, and TensorFlow. Practical exposure to **Generative AI, prompt engineering, LLMs, and RAG**. **Strong interest in technology, problem-solving, and continuous learning.**

PROFESSIONAL EXPERIENCE

Python Full Stack Trainee — Dhee Coding Lab (BTM Branch), Bengaluru

Feb 2026 – Present

- Enrolled in a Python Full Stack Development program with hands-on experience in building web applications using industry-relevant technologies.
- Applied **Python, SQL, HTML, CSS, JavaScript, React.js and Django** to develop and debug functional web applications and projects.
- Worked with **REST APIs, JSON, Git, GitHub, and Postman** for application development and API testing
- Developed practical skills in **problem-solving, debugging, technical documentation, and software development practices.**

PROJECTS

Lung Disease Detection Using Machine Learning | Python, HTML5, CSS3, JavaScript, Django, PostgreSQL

- Developed an AI-powered lung disease detection system using Python, TensorFlow, and the **EfficientNet-B0 Convolutional Neural Network (CNN)** to classify chest X-ray images into Normal, Pneumonia, and COVID-19.
- Built a user-friendly web application that enables users to upload chest X-ray images and receive automated **CNN-based** disease predictions.
- Implemented image preprocessing using **OpenCV**, including **image resizing, normalization**, and preparation of chest X-ray images for CNN-based disease prediction.
- Implemented the complete workflow including image upload, preprocessing, automated prediction, result display, and report generation.

TravelMate | Python, HTML5, CSS3, JavaScript, Django, SQLite

- Developed a travel booking platform using **Python, Django and SQL**, where users can explore destinations, compare travel packages, and book trips through a simple **web interface**.
- Implemented **CRUD operations** for user accounts, destinations, travel packages, and trip bookings using Django and SQL.
- Implemented **user authentication and login functionality** using Django, along with travel package selection and booking features.

Course Management System | React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Axios

- Developed a responsive Course Management System using React.js, JavaScript, HTML5, CSS3, and Tailwind CSS with a reusable **component-based architecture**.
- Implemented **React Router** for seamless **navigation** between course listing, course details, and management screens.
- Managed application state using **React Hooks** and utilized props for efficient **parent-child component** communication.
- Used **Axios** to fetch and update course data, with responsive UI styling and optimized component rendering.

EDUCATION

B.E., Computer Science & Engineering (AI & ML) — CGPA: 9.09/10

Dec 2022 – May 2026

V.S.M. Institute of Technology (VTU), Nipani

Science Pre-University — 78.16%

Jun 2020 – Apr 2022

K.L.E. Basavaprabhu Kore College, Chikodi

SSLC — 74.24%

Jun 2019 – Jun 2020

C K High School, Examba

SKILLS

Programming Languages: Python, JavaScript

Web Technologies: HTML5, CSS3, React

Frameworks & APIs: Django, REST APIs

Tools / Platforms: VS Code, Git, GitHub, Postman

AI & Digital Skills: Generative AI Tools -ChatGPT, Gemini, Claude, Copilot, Prompt Engineering

Databases: SQL

Concepts: OOP, CRUD Operations, Data Structures, SDLC, Agile, Machine Learning, Deep Learning, Gen AI, LLMs, RAG

Languages: English, Hindi, Marathi, Kannada, Urdu

Soft Skills: Problem-solving, Team collaboration, Technical documentation, Time management

CERTIFICATIONS & HONORS

- University Rank Holder** (5th & 7th Semester); achieved **93.62%** final-year aggregate.
- Solved **350+** LeetCode problems through regular, disciplined coding practice.
- Earned LeetCode's **100 Days Badge** for consistent problem-solving and **SQL 50 Badge** for completing LeetCode's SQL 50 challenge.
